FUND DESCRIPTION

Investment Objective: The Horizon Digital Frontier ETF seeks capital appreciation.

The Digital Frontier Fund is an actively managed exchange-traded fund ("ETF") that seeks to achieve its investment objective by investing primarily in equity securities of U.S. and foreign companies that offer exposure to transformative digital technologies, including artificial intelligence, blockchain, quantum computing, and cybersecurity. The Fund employs both quantitative and qualitative tools to identify companies across different phases of technology development and allocate assets to capture long-term growth potential in early-stage and rapidly evolving sectors.

ASPECTS OF THIS ACTIVE FUND

Equity: Invests in companies that create and benefit from cutting-edge technologies, including artificial intelligence, quantum computing, blockchain, and cybersecurity.

Long-Term Growth: Targets early-stage and rapidly evolving sectors that are transforming global industries, offering strong growth potential for long-term investors.

Digital Technology: Offers targeted exposure to a diverse range of transformative technology industries, seeking to generate capital appreciation by capitalizing on growth opportunities within these innovation-driven sectors.

PERFORMANCE (%) as of 06/30/26

	3 MO	YTD	1 YR	*Inception
Fund Market Price Return	24.75	17.46	N/A	31.05
Fund NAV Return	24.35	17.05	N/A	30.57
NASDAQ 100 Total Return Index	27.74	20.31	N/A	33.27
S&P 500 TR	15.20	10.21	N/A	21.16

**Inception date is 7/9/2025. Benchmark Since Inception is as of the Fund Inception date. All returns greater than one year are presented as annualized returns. Performance data quoted represents past performance; past performance does not guarantee future results. The investment return and principal value of an investment will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. Current performance of the fund may be lower or higher than the performance quoted. Performance data current to the most recent month end may be obtained by calling 866-371-2399.*

TOP 10* HOLDINGS (%) as of 06/30/26

NVIDIA Corp.	8%
Alphabet Inc. - Class C	7%
Microsoft Corp.	5%
Amazon.com Inc.	5%
Broadcom Inc.	4%

FOOTNOTES

Nasdaq 100 Index is a collection of the 100 largest, most actively traded companies listed on the Nasdaq stock exchange.

S&P 500 TR is the Standard & Poor's index calculated on a total return basis. It is widely regarded as the benchmark gauge of the U.S. equities market and includes a representative sample of 500 leading companies in leading industries of the U.S. economy. The S&P 500 Total Return Index (SPTR) is one example of a total return index. The SPTR is different from the standard S&P Index (SPX), which does not include dividend gains. The total return indexes follow a similar pattern in which many mutual funds operate, where all resulting cash payouts are automatically reinvested back into the fund itself.

You cannot invest directly in an index and unmanaged index returns do not reflect any fees, expenses or sales charge.

DISCLOSURES

The fund's investment objective, risks, charges and expenses must be considered carefully before investing. The summary and statutory prospectuses contains this and other important information about the investment company, and they may be obtained by calling 866-371-2399 or visiting www.horizonmutualfunds.com. Read them carefully before investing.

Investing involves risk, including potential loss of principal. There is no assurance that the fund will meet its objective.

The ability of the Fund to meet its investment objective is directly related to the allocation of the Fund's assets. Horizon may allocate the Fund's investments so as to under-emphasize or over-emphasize investments at the wrong times or under the wrong market conditions, in which case the Fund's value may be adversely affected.

Investments in securities in general are subject to market risks that may cause their prices to fluctuate over time, and the Fund's investments may decline in value due to factors affecting securities markets generally, or particular countries, segments, economic sectors, industries or companies within those markets. The value of a security may decline due to general economic and market conditions that are not specifically related to a particular issuer. Markets may, in response to governmental actions or intervention, economic or market developments, trade disputes, the spread of infectious illness or other public health issues, geopolitical factors or other external factors, experience periods of high volatility and reduced liquidity, and, in extreme cases, may lead to trading restrictions and halts. These and other similar events could be prolonged and could adversely affect the value and liquidity of the Fund's investments and negatively impact the Fund's performance. Equity securities typically have greater price volatility than fixed income securities. The market price of equity securities owned by the Fund may go down, sometimes rapidly or unpredictably. Equity securities may decline in value due to factors affecting equity securities markets generally, particular industries represented by those markets, or factors directly related to a specific company, such as decisions made by its management. Investments in options involve risks different from, or possibly greater than, the risks associated with investing directly in securities, including leverage risk, tracking risk and, in the case of over the counter options, counterparty default risk. Option positions may expire worthless exposing the Fund to potentially significant losses.

The value of investments in fixed income securities and securities in which the underlying investments are fixed income securities are expected to fluctuate with changes in interest rates. Typically, a rise in interest rates causes a decline in the value of the fixed income securities owned by the Fund or its underlying investments. Issuers of floating rate debt are exposed to higher interest payments in a rising rate environment. Issuers may default on interest and principal payments. Generally, securities with lower debt ratings ("junk bonds") have greater credit risk. The Fund's investment in U.S. government obligations may include securities issued or guaranteed as to principal and interest by the U.S. government, or its agencies or instrumentalities. Payment of principal and interest on U.S. government obligations may be backed by the full faith and credit of the United States or may be backed solely by the issuing or guaranteeing agency or instrumentality itself. There can be no assurance that the U.S. government would provide financial support to its agencies or instrumentalities (including government-sponsored enterprises) where it is not obligated to do so. In addition, U.S. government securities are not guaranteed against price movements due to changing interest rates.

ETFs are subject to additional risks that do not apply to conventional mutual funds, including the risks that the market price of an ETF's shares may trade at a premium or discount to its net asset value, an active secondary trading market may not develop or be maintained, or trading may be halted by the exchange in which they trade, which may impact a Fund's ability to sell its shares. Shares of any ETF are bought and sold at market price (not NAV) and are not individually redeemed from the Fund. Brokerage commissions will reduce returns.

Horizon ETFs are distributed by Quasar Distributors, LLC.
